-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Art Unit: 1654

1. This application contains claims directed to the following patentably distinct species of the claimed invention: The species of opiate destruction-inhibitors which are hydrocinnamic acid, D-PA, thiolbenzyl-phenylalanine, a dipeptide of essential amino acids in D-form, a tripeptide of essential amino acids in D-form, an enkephalin fragment, a dipeptide comprising tyrosine, a dipeptide comprising L-leucine, an oligopeptide or polypeptide comprising D-Phe-D-Leu, an oligopeptide or polypeptide comprising D-Phe-D-Met, and DLPA, are patentably distinct from one another because of their materially different structures. The species of neurotransmitter precursors which are L-Phe, L-dopa, L-Tyr, 5-hydroxytryptophan, L-Trp, L-Glutamine, and L-glutamic acid/L-glutamate are patentably distinct from one another because of their materially different structures. The species of cofactors which are N-acetyl-tyrosine, coleus forskohlii, L-glutamine, mucuna pruriens, rhodiola rosea, pregnenalone, chromium picolinate, chromium polynicotinate, L-Methionine, methylcobalamin-vitamin B12, betaine-TMG, 7-oxo-DHA, acetyl-l-carnitene, green tea catechins, and L-theanine are patentably distinct from one another because of their materially different structures. For each group of compounds, a search for one species will not satisfy the search requirements for the other species.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species of opiate destruction-inhibitor, a single disclosed species of neurotransmitter precursor, and a single disclosed species of cofactor for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-45 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable

Art Unit: 1654

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey E. Russel at telephone number (571) 272-0969. The examiner can normally be reached on Monday-Thursday from 8:30 A.M. to 6:00 P.M. The examiner can also be reached on alternate Fridays.

Art Unit: 1654

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor Bruce Campell can be reached at (571) 272-0974. The fax number for formal communications to be entered into the record is (571) 273-8300; for informal communications such as proposed amendments, the fax number (571) 273-0969 can be used. The telephone number for the Technology Center 1600 receptionist is (571) 272-1600.

A handwritten signature in black ink, appearing to read "Jeffrey E. Russel". The signature is fluid and cursive, with the first name "Jeffrey" being more prominent than the last name "Russel".
